

Expect delays on Route 6 due to Lebanon Pike pipe installation

Effective February 9, 2017 and continuing until further notice, customers traveling via Route 6 buses should expect significant delays due construction of the Cumberland City Low Transmission Water Project on Lebanon Pike.

Between 6 a.m. and 9 a.m., two westbound lanes will be open for morning rush hour traffic. Between 3 p.m. and 6 p.m., two eastbound lanes will be open for afternoon rush hour traffic. During all other time, traffic will be restricted to a single lane in each direction.

Construction work will take place 24 hours a day, seven days a week, and will begin east of the intersection of Lebanon Pike and proceed east on Lebanon Pike. The new 36-inch water main is being installed in the middle turn lane down Lebanon Pike from Donelson Pike to Central Pike.
